## Tourism

The Świętokrzyskie voivodship, due to its excellent geographical location, beautiful nature, great social and economic potential and great investment opportunities, is one of the most attractive regions in Poland.

The Świętokrzyskie region has a great wealth of natural resources such as mineral deposits so the voivodship is a very promising area for investment. Building materials companies, together with the glass and paper industries dynamically operate here. Agro-industrial companies flourish because of the fertile soils and favourable climatic conditions. Our regional food products are widely appreciated as being organic.

In recent years, the Świętokrzyskie voivodship has significantly changed as a result of the completion of investments such as the water supply and sewage systems, the well-equipped educational and cultural institutions, an expanded sports infrastructure or state of the art equipment for the region's hospitals. It was accomplished thanks to the good use of European Union funds.

The rich landscape, beautiful nature and numerous monuments of the Świętokrzyskie voivodship are unique. It is an ideal place both for people practising active tourism and people who seek peace and quiet in the beautiful natural surroundings.

However, the Świętokrzyskie region is attractive not only due to it being an excellent location for relaxation, enjoying beautiful nature and sightseeing as there are great opportunities to invest, earn money and develop economic initiatives here.

I warmly invite you to visit the welcoming Świętokrzyskie voivodship where you will find friendly people awaiting you. This region is really unique and worth knowing.

I am convinced that if you visit the Świętokrzyskie region once, you will want to return again and again.

Marshal of the Świętokrzyskie Voivodship

Andrzej Bętkowski
